	Description of Bug (be specific Aboutwhat is not working)	Location of Bug (file, class, method, etc.)	Steps to Recreate Bug and/or Test Case #	Root Cause Analysis Notes
1.)	Computing OPL election, floating point exception when trying to give away seats when there are no votes to other candidates.	Election, ComputeOPLElection, AssigningSeatsToWinners. (Produced running with input file "opl_give2_invalid.csv"	Want to give away two seats, only one candidate is voted for.	Votingsystem is unable to properly give away another seat when only one candidate was voted for. The program wants to give away one more seat. This problem can be expanded to any number of seats where there aren't enough votes for other candidates.
2.)
